AB - A cosmetic composition comprises 0.01-1 wt.% of extract of artemisia, 0.0005-0.5 wt.% of, (-)-epigallocatechin gallate as a fat soluble flavonoid, 0.0005-0.5 wt.% of galangin as a water soluble flavonoid, and phytic acid which is prepd. from sesame seeds.
(-)-Epigallocatechin gallate is extracted from green tea, and galangin is extracted from A pinia officinarum radix.
Pref. the compsn. is a mixt. of (-)-epigallocatechin gallate and galangin (2:3 - 3:2).
- USE/ADVANTAGE :
The compsn. is useful in the prepn. of skin cosmetic products, e.g. cream, or lotion and hair products, e.g. shampoo or hair rinse. The compsn. removes hazardous organic free radicals and activated oxygen species.
